

Supporting students affected by US visa issues

We understand that last-minute visa delays and denials may be causing disruption and anxiety for applicants pursuing study options in the United States this September.

The University of Strathclyde offers a swift route for students' plans to stay on track. As a leading international technological university, we offer many programmes with accreditation that carry weight on both sides of the Atlantic:

- Strathclyde Business School holds **triple accreditation** from the three main business school accreditation bodies – AMBA, EQUIS and AACSB. AACSB in particular is considered the gold standard for business school accreditation in the US
- Our Mechanical, Chemical and Electrical & Electronic Engineering degrees are **professionally-accredited by iMechE, iChemE and IET** respectively. These are recognised under the Washington Accord as “substantially equivalent” to ABET accreditation - the gold standard for engineering accreditation in the US.
- Our Computer Science degrees are **accredited by the BCS, Chartered Institute for IT**, recognised under the Seoul Accord as equivalent to ABET-CAC accreditation - a recognised mark of programme quality in the US.

Rapid transition

For students whose US plans have changed or remain uncertain, our dedicated international teams provide wraparound assistance on everything from personalised application guidance and visa advice to
